

JIAWEI DU

☎ +86 13720122598 ✉ isjiawei.du@gmail.com [in LinkedIn](#) [Github](#) [Google Scholar](#) [Webpage](#)

Research Profile

Jiawei's research interests are primarily focused on speech technology and its related fields, especially in the applications of Automatic Speaker Verification (ASV), Audio Neural Codec, and Audio Deepfake Detection and Localization. These research directions aim to help humans distinguish between truth and falsehood in the era of AIGC explosion.

Currently, he is focusing on Audio-Visual Anti-Spoofing, as deception is often more convincing in multi-modal scenarios.

Education

National Taiwan University

2022 - Present

M.S. in Computer Science and Information Engineering (CSIE), GPA 4.13/4.3

Taipei, Taiwan

- Ranking 1/201 in the department during Semester 1 of the 2023/24 academic year.
- Research focused on Audio Neural Codec, Deepfake Localization and Detection, Automatic Speaker Verification (ASV), and Audio-Visual Learning.
- Under the guidance of Prof. Jyh-Shing Roger Jang in NTU MIRLab.

Ming Chuan University

2018 - 2022

B.S. in Information and Telecommunications Engineering (ITE), GPA 3.98/4.0

Taoyuan, Taiwan

- Ranking 1/79 in the department cumulatively.
- Under the mentorship of Prof. Shu-Yin Chiang in the area of Robotics.

Shanghai Jiao Tong University

2020 - 2021

Exchange Student in Computer Science and Technology

Shanghai, Chinese mainland

- Core Courses: Digital Signal Processing, Digital Graphics Processing, Computer Network, Computer Vision

Publications

Neural Codec-based Adversarial Sample Detection for Speaker Verification

2024

Anonymous submission

Xuanjun Chen*, Jiawei Du*, Haibin Wu*, Jyh-Shing Roger Jang, Hung-Yi Lee

EMO-SUPERB: An In-depth Look at Speech Emotion Recognition

2024

Submitted to ACL 2024

Haibin Wu, Huang-Cheng Chou, Kai-Wei Chang, Lucas Goncalves, Jiawei Du, Jyh-Shing Roger Jang, Chi-Chun Lee, Hung-Yi Lee

Dcase 2023 task 6b: Text-to-audio retrieval using pretrained models.

2023

DCASE2023 Challenge, Tech. Rep, 2023

Chung-Che Wang*, Jiawei Du*, Jyh-Shing Roger Jang

Research Experiences

Deepfake Detection

06/2022 - Present

- Audio-Visual: Explored the limitations of current state-of-the-art (SOTA) Audio-Visual Deepfake Detection methods, and improved the mAP@50 from 13.1% to 75.7% on our private AV Deepfake dataset.
- Singing Deepfake: Achieved state-of-the-art on the CtrSVDD dataset, reducing the previous SOTA Equal Error Rate (EER) by 50%.
- ASVspoof: Researched and applied nearly all methods from the past five years, including RawNet2, AASIST, Wav2Vec2-AASIST, etc.

Audio-Text Cross-Modal Learning

02/2022 - 06/2022

- Investigated language-based audio-text retrieval. Redesigned and explored the performance of different models in speech-text retrieval, and experimented with various data augmentation methods.

Projects

Pick and Place Perler Beads by a Six-axis Robotic Arm using Image Recognition 01/2021 - 12/2022

Information and Telecommunications Engineering, Ming Chuan University

Final Year Project

- Imaging processing by de-shadowing to achieve highly accurate recognition of beads' locations by Hough circle transform (HCT).
- Responsible for the algorithm and device design of the robotic arm.
- Created C# WinForms and programming to visualize and control the robotic arm.

Research on Algorithms of Medical Image Enhancement Based on Noise OCT 10/2020 - 01/2021

Computer Science and Technology, Shanghai Jiao Tong University

Term Project

- Compared the capacity of denoising OCT images by Python among different algorithms (Side Window Filtering; Non-local Means; BM3D; Learning Self-Supervised Denoising from single image).
- The quality of images was enhanced by iterative denoising processes, and the enhancement of each algorithm was evaluated by the PSNR (Peak signal-to-noise ratio).

Honours and Awards

- Currently ranked first in the CtrlSVDD competition as of March 14, 2023.
- DCASE Challenge 2023 Task 6b, ranked 3/10.
- Received one class ranking first scholarship and five departmental ranking first scholarships in Dept. ITE, Ming Chuan University.
- Masterpiece Award for General Course (ranked 4th) in Ming Chuan University
- Excellent Student Cadre by Association of Hubei Students in Taiwan

Extra-curricular Activities

Mainland – Taiwan Student Association

09/2019 - 04/2020

Ming Chuan University

Secretariat of general affairs

- In charge of overall budget planning and execution, purchasing, fundraising, communication with university administration and students.
- Planning and implementation of year-round, campus-wise activities.

Skills

Languages: Python, PyTorch, C++

Typesetting: LaTeX, Markdown

Language: Mandarin (native speaker), English (IELTS 6.5)

Hobbies: Singing, Piano, Guitar, Electronic Keyboard, City Walk, Traveling, NBA
